

Directly responsible to the Director.

The Deputy Director - Engineering is responsible for:

- Formulation, implementation and coordination of policies, procedures and programs pertaining to long-range planning, highway needs assessments, the six-year highway construction program, highway location studies, environmental evaluations, highway functional studies, roadway design, bridge design, traffic engineering, and right-of-way acquisition.
- Defining and recommending related legislative needs.
- Periodic review of all assigned responsibilities and initiating modifications as indicated.
- Office staffing and staff development.
- Helping establish and maintain compliance with Departmental operating instructions, policies and procedures.
- Maintaining necessary files, reporting systems, and inventory control.
- Ensuring the office policies, procedures and programs are communicated throughout the Department.
- Coordinate and approve appropriate strategies to improve performance measures.
