MDC Logitech C600 Installation Guide

1) Power up the MDC. Do not plug in the webcam yet.
2) Close all programs that start up when the system boots (Verizon software/MDC software)
3) Drop the provided files (ks.sys, msh263.drv, tsbyuv.dll, and vidcap.ax) into the C:\Windows\system32 folder on the MDC. Ensure that ksuser.dll is already there.
4) Plug in the webcam.
5) The New Hardware Wizard should appear, if not, go to Control Panel > Add New Hardware.
6) Select "Yes, this time only" and hit next
7) Make sure install software automatically is selected and hit next.
8) Every time a "Files needed" dialog box appears, click "Browse" and select the file it wants from the system32 folder.
9) When the warning box appears, select "Continue Anyway"
10) Once you have finished this, a second new hardware wizard should appear.
11) Select "No, not this time" and next, then next again.
12) Make sure "Don't prompt me again to install this hardware" is checked, and click finish.
13) In the "Logitech Update" box that appears, uncheck "Install software updates automatically", the hit next and then finish.
14) Plug in the second webcam, and if any New hardware wizards appear, do steps 12 and 13.
15) Go to the C:\WINDOWS\system32 delete LVUI2.dll and LVUI2RC.dll and replace them with the new versions.
16) Open the MDC software and test the cameras.
