

Asphalt Screed

Innovation Purpose

We wanted a way to help make the asphalt level when patching a spot with hot asphalt.

Innovation Description

The Asphalt Screed helps the crew not have to do as much raking of the asphalt and helps the patch be more uniform with the road surface. Also, we made the screed adjustable with hydraulic cylinders so you can easily make corrections as needed to conform to the road surface.

Implementation Date

May 2017

Innovation Highlights

It's pretty groovy!
