

Extra Propane

Innovation Purpose

Our Tack oil trailer would run out of propane on the job, we had another propane tank but not a good way of transporting the extra bottle except just tying it in the back of the pickup

Innovation Description

We fabricated another propane tank mount and attached it to the trailer alongside the factory mount. Now it is very easy to swap the hose over to the new tank if we run out. It is also more secure than tying it into the back of our pickup.

Implementation Date

March 2014

Innovation Highlights

Saves time and improved safety.
